LOCATION SERVICES

Location Services & **Parental Controls** for
Parenting in the Digital World

Safety Areas & Automatic Alerts

Your users can create virtual fences around designated areas and receive automatic notifications when their child enters or leaves the area.

Family Hub

Same app, **two profiles** - Adult and child; Your family at a glance - location, alerts, requests and quick actions all immediately available from the main screen.

Real-Time Tracking

SafePath makes it easy to locate children in real time as they move to different locations.

Activity History & Timeline

Parents are able to see where their children have been and the path they took to get there.

SafePath® FAMILY

INTEGRATED PARENTAL CONTROLS

Parents can control and manage online content across all connected devices by setting **screen time** limits and digital **content filters** based on an individual's profile.

App & Web Management

Children are protected from inappropriate content thanks to online content filters that match each child's age and interests.
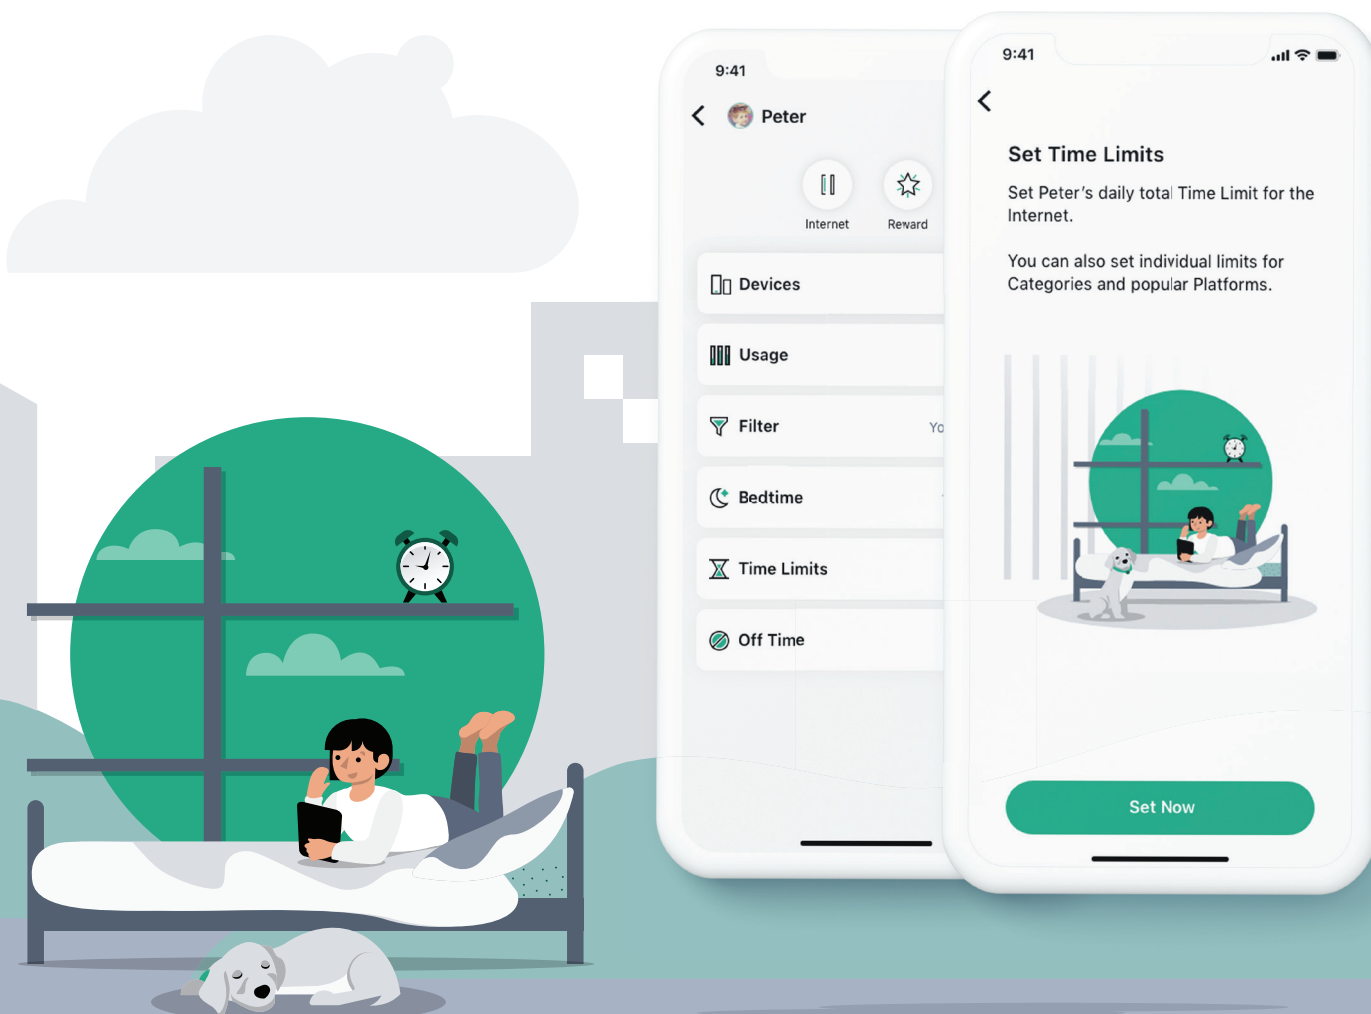

Time Limits

Parents can proactively manage the time kids spend on their phone and restrict app-specific or total device usage.

Rewards

Kids can get rewarded for good online behavior with digital gifts like more screen time or a later bedtime.

Suspend Internet

Suspend internet to all devices (or just one) with the press of a button.

REPORTING & DOWNTIME

Get a complete picture of your household's internet use, across **all devices**. That way, you can make **informed decisions** about the amount of time that's right for your family

⊘ Off Time
Schedule offline time in advance, so you can enjoy family time.

▮▮▮ Usage
Compare time online today, last week, or months past.

▭✓ Parity
Full feature parity between iOS and Android.

↺ History
Get a detailed breakdown of which sites were visited throughout the day.

☾ Bedtime
Make late-night scrolling a thing of the past.
