

INDUSTRY-LEADING LOCATION SERVICES, PARENTAL CONTROLS, & DRIVE DETECTION UNDER ONE APP

SAFEPath DRIVE

Using smartphone sensors, SafePath Drive gives next-level **peace of mind on the road** for drivers and passengers, in any vehicle for every trip.

Trip Details

Review individual trips for specific information such as route, miles logged, top speed, driving behavior, and the location of any driving events that took place along the way.

Gamification Elements

Add an element of competition with a snapshot of weekly family rankings to encourage safer driving for all family members.

Driver vs. Passenger Detection

Receive automatic notifications with location information and the option to dispatch emergency services if a family member has been involved in an accident.

Personalized Drive Score

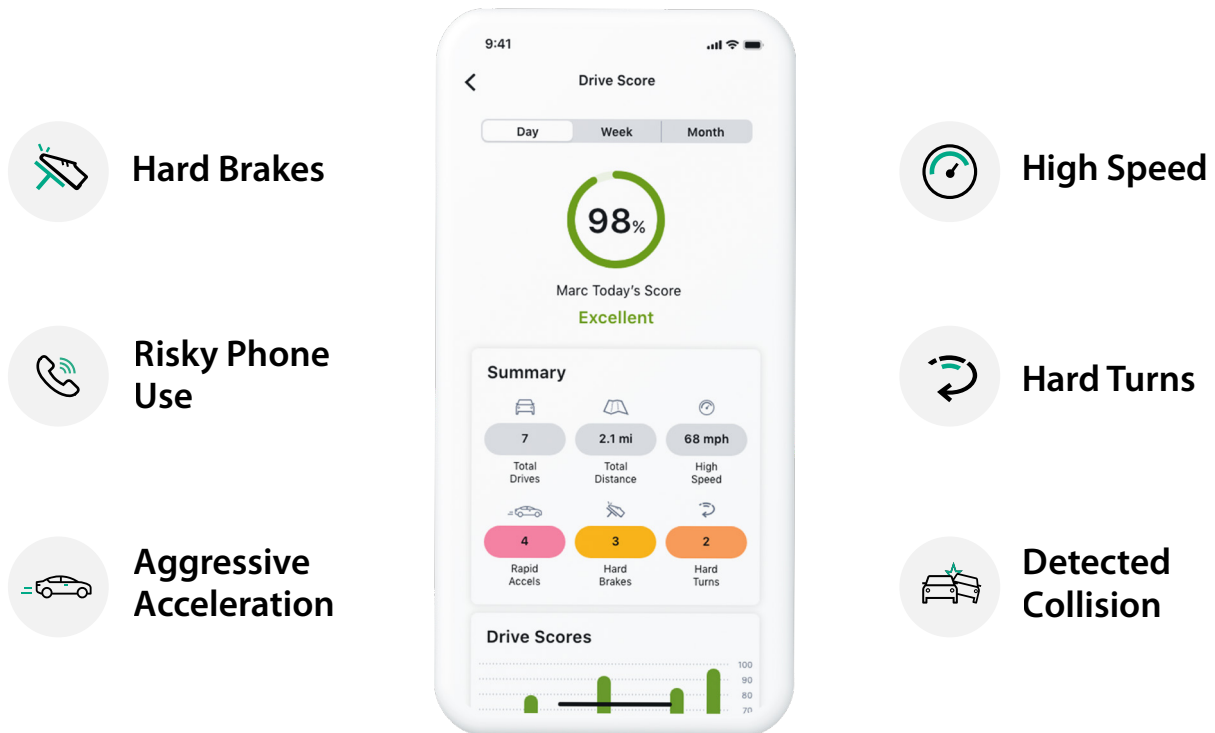

Access detailed driving information, so you can be made aware of risky driving events.

SAFEPATH DRIVE

Data Collected

A Personal Drive Score is calculated through a comprehensive analysis of driving behaviors.

SafePath Drive Benefits

Fuel peace of mind and encourage safer driving.

- Increases Driver Awareness
- Helps Limit Phone Use
- Monitors Family Safety
- Delivers a Personalized Driving Score
- Detects Collisions & Distributes Automatic Collision Notifications

SafePath Drive can be added to existing SafePath-powered apps or can be deployed as a stand-alone driver safety app. Like all other SafePath product modules, SafePath Drive is a white-label solution designed for wireless carriers and other communication service providers.
